

Module 6: Using the Child and Adolescent Flipcharts

Time: 30 minutes

Session Objectives

By the end of this session, participants will be able to use the Adolescent and Child Viral Load Monitoring and Enhanced Adherence Counseling flipcharts in order to:

- Interpret and explain the meaning of a viral load result that is low
- Understand the difference between undetectable viral load, low viral load, and high viral load
- Assess adherence among those with high viral loads
- Develop targeted interventions to improve adherence support
- Manage steps based on repeat viral load results

Session Overview

- Child Flipchart
- Adolescent Flipchart

Materials Needed

- Slides
- Adolescent Flipchart
- Child Flipchart

25 minute
Lecture

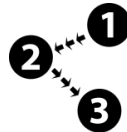

Trainer will:

- Introduce the Child Viral Load Monitoring and Enhanced Adherence Counseling Flipchart
 - Purpose and intended users
 - New slides in the Child Flipchart not in the Adult Flipchart
 - Talking to your child about ARVs
 - Child-specific enhanced adherence counseling interventions
- Introduce the Adolescent Viral Load Monitoring and Enhanced Adherence Counseling Flipchart
 - Purpose and intended users
 - New slides in the Adolescent Flipchart not in the other flipcharts
 - Keeping your virus low
 - Adolescent-specific enhanced adherence counseling interventions
 - Taking charge of your ARVs

5 minute Wrap-up	Trainer will ask if audience has any questions.
